# Web server Runbook

Short Description

Ansible playbook that starts a mariadb so that students can look up courses

Required Software

Ansible centos vagrant

Architecture Diagram

Deployment

Ansible-playbook -i hosts.ini web.yml --ask-vault-pass
Ansible-playbook -i hosts.ini db.yml --ask-vault-pass

Issues

Might need to run multiple times
Needs to run inside vm
Needs to have machine that has ansible properly configured
In db.yml ignore the localhost failed
